Subject: It's time to stop!!!!!!!

the Fed. Gov. blackmail of Microsoft and the welfare for Netscape and all the other competitors of Microsoft.

This I would expect in the Old Russia or China today, but not here in this Country where the free open market has made this the greatest civilization in history.

It's time to stop the socialist/ communistic approach. I think you have too many still their from the slick willie era and house should be cleaned or you need to go back and retake ecom. 101. You are going to keep screwing around and destroy the most innovative industry to come down the pike in history, who single handily created more jobs than you can tally, my guess would be more than the automotive industry did in it's time. Who is going to suffer? THE AMERICAN PEOPLE and our economy. The turn down in the economy before September 11, 2001 I'm sure can be tied to you'alls suit against Microsoft.

I guess your'alls response will be to sit back all smug with your thumbs hooked in your suspenders and say look what we have done HURRAH, HURRAH!!!

REMEMBER YOU ARE PART OF THE AMERICAN PEOPLE TOO, SO THOSE hurrah hurrah better be said in a whisper because you are going to look like fools.
